

# Phragmites Ground Control

Long Point PP and Long Point Crown Marsh 2021 application sites.

Turkey Point 2021 proposed application sites.

## Phragmites control project area, August to September 2021

**NOTICE:** An aquatic herbicide application for the control of *Phragmites australis* is planned for the months of August and September at Long Point Crown Marsh, and Long Point and Turkey Point Provincial Parks.

Residents within 1000 meters of the project areas should visit <http://longpointphragmites.ca/> for regular updates on the herbicide application and recommended precautions.

**Anticipated Start Date:** August 15, 2021 (weather permitting)

**For updates visit:** <http://longpointphragmites.ca/>

**Herbicide: Habitat Aqua** (active ingredient: imazapyr)

As a precautionary measure, all residences using a surface water system for consumption (for example: taking water directly from the boating channel or inner Long Point Bay to drink, cook or for food preparation) should shut down their water system and avoid consumption of the water for a minimum of 48 hours following herbicide application. Systems should be flushed for at least 20 minutes before consuming again. Please note: these precautionary measures are only for those with private water systems drawing water from the channel or inner Long Point bay. **If you get your water from the Port Rowan Municipal Water System, no action is required. There is NO RESTRICTION on the use of water for recreation or domestic purposes (i.e. toilets, showers)**

**For more information regarding the aquatic herbicide application contact:**
